I am a dedicated computing student currently following a Higher National Diploma at BCAS Campus and actively building my skills in software and web development. I have practical exposure to Java Python HTML CSS JavaScript Bootstrap PHP and MySQL through academic work and self learning. I am especially interested in full stack development where I focus on creating clean user friendly interfaces and developing reliable backend systems. With the rapid growth of artificial intelligence in the tech industry I continuously improve my knowledge by exploring modern and intelligent web based solutions. My goal is to grow as a professional Full Stack Developer who can design scalable efficient and user focused applications. I also have a solid understanding of Object Oriented Programming principles which I apply in backend development to produce structured maintainable and high quality code.

## EDUCATION

- **Jaffna Central College** (2023)
  - **Complete Advanced level in E tec**  
Science for Technology – S  
Engineering Technology - S  
Information and Communication Technology– C
- **Bcas Campus Jaffna** (May 2024 – Jan 2026)
  - Complete the HND in Software Engineer
- **DMI Computer Education (on Process)** (Jan 2026)
  - Python
  - JavaScript
  - Graphics Design

## PROJECTS

- Sampath Foodcity Website Mock up (Ui/UX)
- Electronic Store Billing System ( java )
- IoT based Smart Lab (Smart parking , Emergency Exit , smart garden ,smoke alert extra) (Group Project)
- Bakery Website (Html ,CSS, JavaScript with database connection)
- Sampath Food City Data Analysis System (Python)

## SKILLS

### Skills

- Problem-Solving
- Strong Communication
- Web Design
- Management Skills
- Critical Thinking
- Leadership

### Technical Skills

- Proficient in programming languages such as Python and JavaScript
- Good knowledge in HTML CSS for responsive web design
- Basic understanding of backend and database concepts using SQL
- Familiar with data analysis and scripting using Python
